EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sam Huang on March 18, 2004.

The application has been amended as follows:

In claim 2, line 23 the phrase "the slippage ratio" has been changed to --a slippage ratio--;

In claim 5, line 16 after the phrase "accelerator pedal is depressed," insert --wherein said second control means sets as a control target value a control amount of said actuator such that the transmission torque capacity of said starting clutch becomes equal to a set value of the engine absorption torque, said set value of the engine absorption torque being a value obtained by multiplying a reference value of the engine absorption torque corresponding to the engine speed by a predetermined safety factor, and

wherein said second control means controls said actuator based on the control target value while detecting a slippage ratio of said starting clutch and feedback correcting said control target value such that said slippage ratio becomes equal to or less than a predetermined value.--

Allowable Subject Matter

2. Claims 2, 3, and 5 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or render obvious a vehicle starting clutch control device for controlling a transmission torque capacity of a starting clutch as recited in claims 2 and 5, and particularly wherein a second control means sets as a control target value a control amount of the actuator such that the transmission torque capacity of the starting clutch becomes equal to a set value of the engine absorption torque, which is obtained by multiplying a reference value of the engine absorption torque corresponding to the engine speed by a predetermined safety factor.

The prior art of record fails to show or render obvious a vehicle starting clutch control device for controlling a transmission torque capacity of a starting clutch as recited in claim 3, and particularly wherein a delay means starts a control of a third control means after a transmission torque capacity of the starting clutch is maintained to a value corresponding to the engine absorption torque resulting when the engine speed is substantially 1000rpm for a predetermined time after an accelerator pedal is depressed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis J. Abdelnour whose telephone number is (703) 305-5309. The examiner can normally be reached on Monday-Friday, 8:00-5:30, alternate Fridays off.
